Practice and theory in all areas depend on basic assumptions in the background of discussion. *Inquiry* gives precedence to articles and discussions which bring these assumptions into focus and which place questions of policy or theory in the wider context of traditional philosophical concerns. Preference is also given to papers composed in a style that renders their content accessible to non-specialists.
Papers will as a rule be published within one year of receipt.
Reviews are confined to extended discussions of books selected for their special interest. Books sent for review are listed in each issue.
Instructions for authors are given on the inside back-cover.

Typescripts for consideration and books for review should be addressed to:
